Summary

Web developer with a one-year internship and a six-month contract at PT Hummatech Indonesia, now studying Applied Informatics Engineering (D-IV) at Politeknik Negeri Malang. Builds Laravel systems end to end — schema, backend modules, access control and reporting.

Experience

Web Developer (Contract)
Jul 2024 – Dec 2024

PT Hummatech Indonesia · Malang, Indonesia

Kept on a six-month contract after the internship. Continued building the Mischool school-management platform: attendance modules, teacher and staff journals, student violations, and Firebase Cloud Messaging notifications. Completed the contract and moved on to full-time study.

Web Developer Intern (PKL)
Jul 2023 – Jun 2024

PT Hummatech Indonesia · Malang, Indonesia

One-year internship during vocational school. Built features on two Laravel products — Kelas Industri and Mischool — covering CRUD modules, schema migrations, per-role permissions, and Excel/PDF report exports.

Projects

Mischool — School Management Platform
2024

Laravel · MySQL · Blade · Firebase FCM · Maatwebsite Excel

Multi-tenant platform serving several schools from one codebase, each on its own subdomain: attendance, teaching and staff journals, violations, exams and a guest book. Built backend modules, card-based attendance with per-lesson recaps, and Firebase push notifications to the mobile apps.

mischool.id

Kelas Industri — Industry Class Management
2023

Laravel · MySQL · Blade · Bootstrap · DomPDF

Manages industry-class programmes connecting schools, mentors and students: school and batch data, class assignment, materials, assignments, exams, attendance and mentor journals. Built CRUD modules, schema migrations, and per-role access for admin, mentor, teacher and student.

Private repository — PT Hummatech Indonesia

MagangMatch — Internship Management System
2025

Laravel · Filament · MySQL · Tailwind CSS

Internship management system for the Informatics department: online applications, partner verification, student logbooks, assessments and placement letters. Built the Laravel backend and a Filament admin panel, with token-based logbook approval for supervisors and PDF letter generation.

github.com/ibnuzzi/PBL_Magang

Lab NCS — Network & Cyber Security Lab Website
2025

PHP · MySQL · Tailwind CSS

Website for the campus Network & Cyber Security laboratory: profile, services, gallery and archive pages, plus an admin login and content management for lab staff.

github.com/ibnuzzi/PBL_LAB_NCS_TI-2A

Awards

PKM-K — Passed Internal Selection, “Playtester”
2026

Student Creativity Program (PKM), Politeknik Negeri Malang

Team member on Playtester, submitted under the Entrepreneurship (PKM-K) scheme. Passed the campus-level selection round and was forwarded to the national assessment stage.
